UMPSA Pekan, Pahang

OBJECTIVE

Passionate software engineer with strong problem-solving skills, particularly in mathematics, programming, and analytical thinking. Known for excellent communication and a positive, collaborative approach, I am eager to contribute to impactful projects in the IT sector, with a commitment to rapid growth and increasing responsibility.

SKILLS

• C • HTML • CSS • JavaScript • ReactJS • PHP • MySQL • Git & GitHub

• Data Structure & Algorithm • Requirements Analysis • System Design • Project Management

EDUCATION

Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA)

2022 - Present

- Bachelor of Computer Science (Software Engineering) with Honours
- CGPA : 3.15

PROJECTS

Academic Course Planner System | Final Year Project

2024 - ongoing

- Developing a web-based system to improve the course registration process at UMPSA by automating timetable creation, checking for schedule conflicts, and managing course information. The system enables students to streamline registration and avoid scheduling errors, enhancing efficiency and accuracy in course planning. Built using PHP, HTML, CSS, JavaScript, and MySQL in VS Code. [Github Link](#)

Shop Islam | E-Commerce Project

2024

- Designed and built a simple, web-based shopping platform using ReactJS, with data persistence through local storage. The site allows users to browse and interact with products seamlessly in a clean, user-friendly interface. [Github Link](#)

News Islam | API-based News View Website

2024

- Created an interactive news website using JavaScript, HTML, and CSS that fetches live data from a news API. The site delivers a clean, visually appealing interface for users to browse and read the latest news articles in real time. [Github Link](#)

ADDITIONAL INFORMATION

- Certification:** Aspire Leaders Program 2024
- Awards/Activities:** Dean's Award 2023 | Sukom 2024 Futsal Champion Team | Performed in International Fiesta 2023
